

Abstract

Wood-burning oven

A wood-burning oven is provided with a plurality of baking chambers arranged one above the other, a combustion region and a flue-gas guidance, it being possible for the individual baking chambers to be closed off in relation to the flue-gas guidance by pivotable baking-chamber flaps. Flue-gas-duct flaps are arranged in the flue-gas guidance so as to produce a meandering flue-gas guidance when the flue-gas-duct flaps and at least some of the baking-chamber flaps are closed.
